AASHISH K

SUMMARY

Java developer with 5 plus years of industry experience at Infosys and Cognizant Technology Solutions.

SKILLS

Java, Java collection framework, SQL, Spring, Spring MVC, Spring Boot, Hibernate, Spring cloud (Zuul, Eureka, Hystrix, Ribbon, Feign), MySQL, GIT, Kafka.

EXPERIENCE

Voluntary Career Break

NOV 2023 – PRESENT

- Took a planned sabbatical to focus on mental well-being, personal growth, skill enhancement and consider future prospects.
- Pursued the Spring Framework Specialization course on Coursera which consisted of Spring - Ecosystem and Core, Spring Data Repositories, Spring MVC, Spring Boot and Rest Controllers and Spring - Cloud Overview, and courses on Docker & Kubernetes and Apache Kafka on Udemy.
- Built a basic application with microservices architecture having Product, Order, Inventory services with a Eureka server for service discovery and API Gateway.
- Working on building a simple CRUD application 'LFC Fan Clubs' to manage user data, group information and view upcoming events/meetups.
- Spring Boot, Spring MVC, H2 database, Spring cloud (Eureka, Feign, Zuul, Hystrix, Ribbon), Hibernate, Lombok, HTML, CSS, React, Bootstrap, Reactstrap, Javascript, Github, React, GIT, SQL, MySQL, Kafka, Docker & Kubernetes.

Cognizant Technology Solutions, Bengaluru — *Associate - Projects*

MARCH 2022 – OCT 2023

- Contributed to the implementation of a 'User Management App', an application used across the project to manage Non-Person Accounts, Distribution Lists, Shared Drive Access, and Shared Mailboxes for users with admin and non-admin access roles and and actively participated in testing its features, working in an agile set up.
- Aided the development of batch processing capability of the User Management App.
- Briefly worked on Zscaler, a global leader in zero trust, its configuration and troubleshooting alongside leading SMEs in the field.
- Java Core, SQL, PL/SQL, Tomcat 9, Oracle DB, Struts2, JDBC, Spring, Jira, JSP, Zscaler.

Infosys Limited, Bengaluru — *Technology Analyst*

JULY 2018 - MARCH 2022

- Trained on Java Core, Python, Angular, Hibernate and Spring.
- Briefly worked on web scraping using Beautiful Soup, a Python library.
- Worked on enhancing java tools used in data migration activities in an agile setup.
- Developed a Java-based validation tool to automate the validation of data for drops after data migration processes, replacing manual efforts, increasing productivity, and significantly reducing man-hours.
- Built a tool which merged different image handling processes optimizing the overall process flow of data migration, automating the manual tasks involved.
- Java Core, SQL, Python, Beautiful Soup, Azure Devops, XSLT, Spring, Angular, JSP, HTML, CSS, Javascript.
